

# PLASTICS GUIDE 2026

**High-quality plastic dispensing syringes, cartridges, components, and needles  
used by the most demanding industries in the world.**

**Techcon Plastics** are accepted by the aerospace, medical device, automotive, consumer electronics, and military & defence sectors.

## TECHCON PLASTICS STANDARDS 2026

Through months of research and refinement, testing and trial & error, Techcon is proud to announce our new level of quality standards for cleanliness, consistency, purity, resistance to impact, high pressure, or extreme temperatures, for all our plastic packaging products.

Our focus is not on meeting standards set by local, national, or global authorities.

Our focus is on exceeding your standards.

And continuing to raise our own.

When you purchase from our line of high-quality dispensing plastics, you can rest assured each piece was produced while adhering to the **TECHCON PLASTICS STANDARDS**:

- Meet or exceed industry standards for repeatability
- Meet or exceed industry standards for UV blockage
- Meet or exceed global ROHS and REACH standards
- Achieve Impact resistance two-times industry requirements
- Produced in a Silicon-free, Chloride-free environment
- Approved for operating pressures up to 100 psi/6.9 bar
- Approved for storage temperatures as low as -40 F/-40 C and as high as 100 F/38 C

**Techcon Plastics Standards** require that all plastics are completely free of:

- |                               |                |             |
|-------------------------------|----------------|-------------|
| ✓ Loose Debris                | ✓ Cold Slugs   | ✓ Waviness  |
| ✓ Contamination               | ✓ Delamination | ✓ Grease    |
| ✓ Blush                       | ✓ Orange Peel  | ✓ Luricants |
| ✓ Flow Lines                  | ✓ Cracking     | ✓ Burns     |
| ✓ Knit Lines                  | ✓ Crazing      | ✓ Gas Marks |
| ✓ Weld Lines                  | ✓ Nicks/Gouges | ✓ Marbling  |
| ✓ Loose Debris, Contamination |                |             |

See the Glossary for definitions of these terms (page 18)

Contact your Techcon representative for complete information about our Plastics Inspection Process.

Techcon 700 Series Precision Syringe Barrels & Components and Dispensing Cartridges & Components are designed to meet the most demanding manufacturing standards. Leading edge materials and advanced engineering design make Techcon packaging plastics unparalleled in dispensing performance.

## TECHCON CLEANLINESS STATEMENT

*All Techcon plastic packaging products are molded and assembled in a controlled clean environment to ensure the highest standards of cleanliness and that our products are free of loose contaminants or debris.*

## INDUSTRIAL CERTIFICATION

Techcon certifies that our Precision Syringe Barrels, Cartridges, and Components meet or exceed ASTM and industry standards, as tested in laboratory conditions, in the following areas:

**Accuracy and Repeatability** – Meet or exceed the repeatability requirement for industrial dispensing use. The O° taper design and tight tolerances ensure the highest rate of dispensing accuracy and repeatability.

**Silicone and Chloride Free** – Molded in a Silicone- and Chloride-free environment to prevent contamination.

**ROHS and REACH Compliant** – Techcon takes every precaution to ensure none of the 700 Series products contain any SVHC (Substances of Very High Concern).

**Burst Strength** – Designed for operating pressures up to 100 psi (6.9 bar). Destructive pressure tests are employed to determine burst strength. All 700 Series syringes pass the destructive pressure burst test.

**Impact Resistance** – Designed to withstand high impact force. Employing the modified Gardner Impact Test of ASTM Standard D5420, it was proven that 700 Series syringe barrels are two times more resistance to impact stress than the industry standard requirements.

**Storage Temperature** – Can be stored (with no pressure applied) between -40 F° and 100 F° (-40° C - 38° C).

**UV Block Capability** – 700 Series UV products meet or exceed industry standards for UV blockage. Dark amber barrels provide UV and visible light block up to 520 nanometers; Black syringe barrels provide 100% UV and visible light block.

**Transportation** – Unfilled 700 Series syringe barrels are safe to transport by ground, sea, or air. Transportation of filled syringe barrels depends on the type of material being packaged. Customers are urged to verify with the material manufacturer its transportation requirements.

If you have questions about Techcon Quality Standards for this or any other product, please contact your Techcon representative.

## 700 Series Syringe Barrel Kits

For your convenience these syringe barrels and white wiper pistons are packaged together without pistons inserted. Kits with blue pistons are also available. Sold in bulk and packs of 50.

### Syringe Barrel Kits With White Wiper Pistons

Size	Natural	Amber	Black
3 cc	7030LL1NW-1000	7030LL1DW-1000	7030LL1BW-1000
5 cc	7050LL1NW-1000	7050LL1DW-1000	7050LL1BW-1000
10 cc	7100LL1NW-1000	7100LL1DW-1000	7100LL1BW-1000
30 cc	7300LL1NW-500	7300LL1DW-500	7300LL1BW-500
55 cc	7550LL1NW-250	7550LL1DW-250	7550LL1BW-250

### Syringe Barrel Kits With Blue Wiper Pistons

Size	Natural
3 cc	7030LL1NBL-1000
5 cc	7050LL1NBL-1000
10 cc	7100LL1NBL-1000
30 cc	7300LL1NBL-500
55 cc	7550LL1NBL-250

## 700 Series Air Powered Pistons

Spread the pressure evenly, using a piston for consistent dispensing of even high-viscosity material. Easy Flow pistons (blue) require less pressure to dispense and prevent air from becoming entrapped during the dispense process. Tight fit Wiper pistons (white) provide a complete seal for low-viscosity fluid. Loose fit straight wall pistons (red) prevent stringing and bouncing when dispensing high-viscosity material. Sold in bulk and packs of 50. Made of polyethylene.

Size	Straight Wall Piston (Red)	Easy Flow Piston (Blue)	Wiper Piston (White)	High Interference (Green)
3 cc	7030006R-1000	7030007BL-1000	7030009W-1000	
5 cc	7050006R-1000	7050007BL-1000	7050009W-1000	
10 cc	7100006R-1000	7100007BL-1000	7100009W-1000	
30-55 cc	7300006R-1000	7300007BL-1000	7300009W-1000	7300008G-1000

## 700 Series Dispensing Components

Our 700 Series Premier Dispensing Components are silicone and chloride-free and designed to work with industry-standard equipment. 700 Series Dispensing components ensure accuracy, repeatability, and productivity.

### 700 Series Syringe Barrels

Unique ultra-low draft construction of the inner diameter yields high accuracy and stability. They are comprised of industry-compliant silicone and chloride-free, low-friction PP. Available in three different colors: Natural for most generic applications, amber provides protection of UV/visible light block (up to 520nm), but with the ability to see material inside the barrel; and Black for total light block. Sold in bulk and packs of 50.

Size	Natural	Amber	Black
3 cc	7030LL1N-1000	7030LL1D-1000	7030LL1B-1000
5 cc	7050LL1N-1000	7050LL1D-1000	7050LL1B-1000
10 cc	7100LL1N-1000	7100LL1D-1000	7100LL1B-1000
30 cc	7300LL1N-500	7300LL1D-500	7300LL1B-500
55 cc	7550LL1N-250	7550LL1D-250	7550LL1B-250

### 700 Series Syringe Barrel Dimensions

Capacity	Overall Length A inches/mm	Outside Diameter B inches/mm
3 cc	2.96/75.18	0.46/11.56
5 cc	2.83/71.9	0.59/14.99
10 cc	3.58/90.9	0.72/18.29
30 cc	4.66/118.36	0.99/25.15
55 cc	6.91/175.51	1.01/25.65

# 700 Series Syringes & Components

## 700 Series Receiver Head Assemblies

Receiver Head Assemblies are the connecting link between time/pressure controllers and syringe assemblies. These assemblies provide a safe connection for accident-proof dispensing. Available with 3 or 6 feet (0.9 - 1.8 meters) of tubing. Consists of a Delrin® receiver head with Viton® O-ring, tubing and male quick connector. Sold individually.

Size	3' (0.9m) Hose	6' (1.8m) Hose	No Hose
3 cc	70303RHB	70306RHB	70300RHR
5 cc	70503RHB	70506RHB	70500RHR
10 cc	71003RHB	71006RHB	71000RHR
30/55 cc	73003RHB	73006RHB	73000RHR

## In-Line Fluid Filter

Attach the fluid filter to the receiver head to prevent fluid from being pulled back from the syringe barrel into the dispenser.

Part No.	Description
881-000-000	In-line fluid filter kit
TSD800-11	In-line fluid filter only

## In-Line Filter Specifications

Housing Material	PP
Filter Media	0.2 µm PTFE
Operating Pressure	75 psi max.

## Replacement O-rings for Receiver Heads

Sold in packs of 10.

Size	EPR O-ring	Viton® O-ring
3 cc	P3015EPK	P3019VPK
5 cc	P3016EPK	P3020VPK
10 cc	P3017EPK	P3021VPK
30/55 cc	P3018EPK	P3022VPK

The Receiver Head is installed with a Viton® O-ring.

## 700 Series End Caps

Designed to seal the large end of the syringe barrel to ensure no contaminants come in contact with material during storage and shipment. Standard color is blue. Made from PP. Sold in bulk and packs of 50.

Size	End Cap
3 cc	703000CB-1000
5 cc	705000CB-1000
10 cc	710000CB-1000
30/55 cc	730000CB-1000

## 700 Series Tip Cap

Designed to seal the syringe barrel tip during storage and shipment. Fits all syringe barrel sizes. Sold in bulk and packs of 50. Made from PP.

Part No.	Description
7015LL-1000	Tip Cap Double Helix Thread Orange
TE7015LB-1000	Tip Cap Double Helix Thread Black

## Stand-up Tip Cap

Designed for easy attachment with large flat base to allow the syringe barrel to stand upright. Sold in bulk and packs of 50. Made of PP.

Part No.	Description
7015STC-1000	Blue Stand up Tip Cap

## TS700 Series Manual Syringe Gun

Lightweight syringe barrel applicator gun provides excellent control for medium/high-viscosity material. Easy to use. No dripping or spillage.

Size	Manual Syringe Gun
10 cc	TS710SG
30 cc	TS730SG
55 cc	TS755SG
Size	Replacement Rods
10 cc	71000ROD
30 cc	73000ROD
55 cc	75500ROD-C

## Finger Switch Assembly

Use the Finger Switch with Techcon's dispensers and syringes in place of a foot pedal. Provides control at your finger tip.

Part No.	Description
DX9010	Finger Switch Assembly for TS Series Dispenser

## 700 Series Manual Plungers & Pistons for 700 Series Barrels

### Manual Plungers & Pistons 700 Series Syringe Barrels

The new manual syringe assemblies provide simple and quick dispensing solutions without the need for compressed air. Molded from PP resin, manual Plungers are compatible with a wide range of dispensing fluids. Pistons are made from thermoplastic rubber and are available dry or with lubrication. Sold in packs of 50.

Plungers and Pistons	
Part No.	Description
7030004PPK	700 Manual Thumb Plunger, 3 cc
7030002MPK	700 Manual Piston Rubber, 3 cc
7030002M-LUBPK	700 Manual Piston Rubber, Lub, 3 cc
7050004PPK	700 Manual Thumb Plunger, 5 cc
7050002MPK	700 Manual Piston Rubber, 5 cc
7050002M-LUBPK	700 Manual Piston Rubber, Lub, 5 cc

Manual Rubber Piston

Plastic Wiper Piston

Air-Powered Rubber Piston

## TS60C-LL-N 140 cc Syringe Barrel

Introducing one of the largest syringe barrels on the market

**Techcon TS60C-LL-N** 140 cc syringe barrel is one of the largest capacity syringe barrels available in the fluid dispensing market, allowing productions to run longer with fewer fluid changeovers.

### Key Features & Benefits

- Made of clear Polypropylene (PP)
- Ultra-low draft construction of inner diameter
- High accuracy and stability
- Silicon and chloride-free
- Connects directly to air adapters
- Allows for longer production runs, Reducing downtime

#### TS60C-LL-N Specifications

Capacity	140 cc (4.73 oz)
Material	Clear PP
Length	177 mm (6.969")
Outside Diameter (O.D.)	40 mm (1.57")
Maximum Pressure	100 psi

#### TS60C-LL-N Part Numbers

Part Number	Description
TS60C-LL-N-50	1 Syringe, 140 cc (QTY = 50)
TS60C-LL-N-250	1 Syringe, 140 cc (QTY = 250)
TS5C-A-50	2 End Cap for TS60C-LL-N Syringe (QTY = 50)
TS5C-A-500	2 End Cap for TS60C-LL-N Syringe (QTY = 500)
TS7P-LL-50	3 Luer lock tip cap for TS60C-LL-N (QTY = 50)
TS7P-LL-500	3 Luer lock tip cap for TS60C-LL-N (QTY = 500)
TS4P-LL-50	4 Piston for TS60C-LL-N Syringe (QTY = 50)
TS4P-LL-500	4 Piston for TS60C-LL-N Syringe (QTY = 500)
RH60CC-LL-6	5 Receiver Head Assembly w/ 6 ft. / 1.8 m Hose

All Techcon syringe barrels are manufactured in our silicone-free facilities in the United States and certified for industrial use.

### Typical Applications

Bonding / Underfill / Potting /  
Conformal Coating

## Cartridges & Accessories

These dependable, high-quality products are designed for the rigors of manufacturing and have undergone continuous improvement to keep pace with the exacting requirements of this challenging field.

Disposable plastic cartridges and nozzles provide a clean, efficient and low-cost method to meet all types of production requirements. Plungers with a wiper-leading edge clean each cartridge thoroughly. Caps for both ends of the cartridges are available, making the system ideal for prepackaged materials and pre-mixed frozen material (PMF) handling.

### Cartridges

Cartridges are available in 2.5, 6, 8, 12 and 20 ounce and 1/10 gallon capacities. Each size can be used with hand or bench-mounted air-powered dispensing tools or manual dispensing tools. Cartridges are molded in either high-density or low-density polyethylene. Custom colors and assemblies are available. Sold in bulk packages.

## Techkit Multi-Component Packaging

Techkit is a compact and simple method of packaging two- or three-component resin systems into a cartridge. The kit physically separates the base and hardener until they are ready to be used. An internal mixing head provides a thorough blend for all types of compounds. When the mixing is finished, the cartridge is placed into one of Techcon's application guns or the Production Master Stand to be dispensed.

Using Techkit will eliminate the labor-intensive tasks of measuring and handling materials, while minimizing skin irritations and greatly reducing exposure to fumes.

Techkits can accommodate virtually every ratio of multiple-component material.

Three types of kits are available: Barrier, Injection and Barrier/Injection types.

**BARRIER KIT:** For compounds with a volumetric ratio greater than 10 parts per 100. The hardener and resin are separated by an aluminum barrier, which forms over the mixing head.

**INJECTION KIT:** For compound with a volumetric ratio of 10 parts or less per 100. The hardener is contained inside the valve mix rod while the resin is in the cartridge.

TECHCON™

## COMPLETE TECHKIT PART NUMBER CHART

Part Number	Size	Type	Cartridge	Plunger	Cap	Cap Mix	Head Rod	Ram Rod

## TECHKIT COMPONENTS

### MIXING HEADS (DASHERS)

Part Number	Description
110-340	1/10 Gallon Mix Head
110-350	1/10 Gallon Foiled Mix Head
600-200	Open Mix Head
600-300	Wheel Mix Head
600-310	Foiled Wheel Mix Head
600-320	Half Closed Circle Mix Head
600-330	Foiled Half Closed Circle Mix Head
600-360	20 oz. Wheel Mix Head
600-370	20 oz. Foiled Wheel Mix Head

### RODS

Part Number	Description
600-080	1 8" (203.2 mm) Ram Rod
600-100	2 6" (152.4 mm) Plugged Rod
600-101	Piston for Injection Rod
610-100A	3 6" (152.4 mm) Valved Rod with Piston
800-100	4 8" (203.2 mm) Plugged Rod
810-100A	5 8" (203.2 mm) Valved Rod with Piston
800-100-METAL	6 8" (203.2 mm) Plugged Rod, Metal

6" Rod = 9 cc, 8" Rod = 12 cc

### SEALANT SMOOTHING AND REMOVAL TOOLS

Techcon plastic sealant tools are ideal for spreading, smoothing and removing sealants or adhesives. Approved for use in the aerospace industry, these tools are designed to prevent damage to delicate substrates. The Spatula is made of Nylon. The smoothing tool is made of Celcon.

Part Number	Description
1275-000-001	Spatula, Large,
1275-000-002	Spatula, Medium
1275-000-003	Spatula, Small
TS1275-KP	Spatula Kit
TS1275-4	Smoothing tool, Red Celcon

## Disposable Nozzles and Dispensing Tip Adapters

Nozzles and dispensing tip adapters provide a wide range of application capabilities. Standard nozzles may be cut back to increase orifice size.

### Standard Nozzles

Standard nozzles are precision moulded from natural polyethylene and have 1/4" NPT male threads to fit all Techcon cartridges or equivalent. Color nozzles are available upon request. Sold in bulk packages of 1,000.

Part No.	Description
TS216-1000	2" (64 mm) x 1/16" (1.6 mm), HDPE
TS218-1000	2" (64 mm) x 1/8" (3.2 mm), HDPE
TS218-LD-1000	2" (64 mm) x 1/8" (3.2 mm), LD
TS416-HO-HD-1000	4" (101.6 mm) x 1/16" (1.6 mm), HDPE
TS416-HO-LD-1000	4" (101.6 mm) x 1/16" (1.6 mm), LD
TS418-HO-LD-1000	4" (101.6 mm) x 1/8" (3.2 mm), LD
TS432-HO-HD-1000	4" (101.6 mm) x 1/32" (0.8 mm), HDPE
TS432-HO-LD-1000	4" (101.6 mm) x 1/32" (0.8 mm), LD
TS490-HO-LD-1000	4" (101.6 mm) x 3/32" (2.4 mm), LD
TS616-HO-LD-1000	6" (152.4 mm) x 1/16" (1.6 mm), LD
TS618-HO-LD-1000	6" (152.4 mm) x 1/8" (3.2 mm), LD

### Specialty Nozzles

Specialty nozzles are precision moulded from natural polyethylene and have 1/4" NPT male threads to fit all Techcon cartridges or equivalent. Sold in bulk packages of 1,000.

Part No.	Description
TS1050-1000	4" (101.6 mm) x 0.5" (12.4 mm) x 0.06" (1.52 mm)
TS1050-45-1000	4" (101.6 mm) x 0.5" (12.4 mm) x 0.06" (1.52 mm)
TS1075-1000	4.5" (114.3 mm) x 0.75" (19.5 mm) x 0.13" (3.3 mm)
TS1100-1000	4.4" (111.7 mm) x 1.0" (25.4 mm) x 0.13" (3.3 mm)
TS1175-1000	4" (101.6 mm) x 1.75" (44.45 mm) x 0.13" (3.3 mm)
TS3106-1000	3.8" (96.5 mm) x 0.35" (8.89 mm) x 0.11" (2.79 mm)
TS3206-1000	3.8" (96.5 mm) x 0.35" (8.89 mm) x 0.11" (2.79 mm)

### Bent Nozzles

Below is the list of standard bent nozzles. Special bent nozzles available upon request. Sold in bulk packages of 1,000.

Part No.	Description
TS416-HO-LD-B30/1-1000	Bent 30° at 1" (25.4 mm)
TS416-HO-LD-B30/2-1000	Bent 30° at 2" (50.8 mm)
TS416-HO-LD-B40/1-1000	Bent 40° at 1" (25.4 mm)
TS418-HO-LD-B30/1-1000	Bent 30° at 1" (25.4 mm)
TS618-HO-LD-B30/2-1000	Bent 30° at 2" (50.8 mm)

### Dispensing Tip Adapters

These tip adapters have standard 1/4" NPT male threads on one end to fit all Techcon cartridges or equivalent, and standard male Luer lock threads on the opposite side to fit all Luer lock dispensing tips.

Part No.	Description
TSD931-7	Dispensing Tip Adapter White PP
TSD931-14	Dispensing Tip Adapter Black PP

TE Series — Dispensing Tips

## TE Series Dispensing Tips

TE Series dispensing tips consist of a stainless-steel cannula with a double-helix PP hub.

This premium line of dispensing tips is burr-free and has an electro-polished cannula for unobstructed and consistent material flow. Silicone and chloride free. Sold in bulk and packs of 50.

### Teflon™ Lined Tips

Teflon™ lined tips are ideal for low-viscosity fluids and cyanoacrylates (CA). They resist CA clogging and prevent damage to substrates. Teflon™ lined tips feature a double-helix PP color hub and a rigid Teflon™ crimped lining that protrudes approximately 1/8" (3.17 mm) from the inside of a stainless steel tube. Sold in packs of 50.

Teflon™ Lined — Dispensing Tips

## TT Series

### Dispensing Tips

The tapered tip prevents blockage and increases the flow of high-viscosity material. Standard tips are molded in high-density polyethylene with UV light block additive. Rigid tips are molded in PP with opaque color. Sold in bulk and packs of 50.

#### Specifications

	ID (mm)	Width Line (mm)	Tip Height (mm)

Red	25	TS25P-1-1/2-500

## BT Series

### Dispensing Tips

Use these double-helix Brush Tips for "spread" applications such as glues, paints and other materials. The Soft brush is made of Red sable. The Stiff brush is made of nylon. Sold in packs of 12.

Gauge	Soft Bristle	Bristle
16	BT16-SOFTPK	BT16-STIFFPK
18	BT18-SOFTPK	BT18-STIFFPK
22	BT22-SOFTPK	BT22-STIFFPK

#### Dispensing Tip Kit

Decide for yourself which tip to use. This kit contains a variety of the most popular 700 Series tips to let you test different tips to find the ones that fit your needs.

Part No.	Description
TN00DKIT	Dispensing Tip Kit

# Dispensing Tips TS Series

## TS Series Dispensing Tips

The TS Series Dispensing Tips offer a variety of dispensing performance and flexibility options. Stainless steel tubing is cut to precise lengths and ground to be burr-free. Cut tubing is crimped into an aluminum locking insert, then molded into polyethylene hubs. Molded hub colors correspond to gauge size. All TS Series tips secure to Techcon syringe barrels and correspond to the Luer lock specification.

Part Number	International Hub Color	Gauge	I.D. (inches)	I.D. (mm)	Length (inches)	Length (mm)

TS28SS-1/2PK	28	0.007	0.17

## MT Series Dispensing Tips

MT Series Precision Metal Tapered Tips deliver the best in high flow rates, which are ideal for high-speed dispensing at a fraction of the cost of comparable precision tips. The smooth internal conical fluid path increases performance and Reduces clogging and back pressure, allowing for higher flow rates.

The phosphor bronze construction with electroless nickel plating makes the MT Series ideal for use in robotic applications or whenever precision counts. The thin-walled design at the tip enhances dispensing accuracy, while at the same time reduces fluid tailing and stringing. Available from 18 to 30 gauge, the MT Series Tips are color-coded for easy identification. Sold individually.

## Key Features & Benefits

- Smooth internal fluid path
  - Reduces turbulent fluid flow
  - Reduces back pressure
  - Increases flow rates
  - Reduces air entrapment and fluid dripping
- Metal construction
  - Provides accurate positioning
  - Ideal for automatic dispensing applications
- Thin walls - Reduces fluid tailing and stringing
- Clog resistant - Ideal for filled fluids

Part Number	Hub Color		Gauge	I.D. (inches)	I.D. (mm)	OD (inches)	OD (mm)

MT30-PBN		Black	30	0.008	0.208	0.013	0.330

## Warranty

### Techcon Consumables Warranty Policy

“Consumables” are primarily plastic disposable parts, such as syringes, pistons, dispense needles, taper tips, cartridges, plungers, etc. and designed for single use.

Techcon/OK International warrants these products against dimensional issues, visual defects, or damage. OK International will replace defective consumable items free of charge at its sole discretion. Replacement of consumable parts is determined on a case-by-case basis and normally validated by return of sample parts to Techcon for inspection.

A Return Material Authorization (RMA) number must be obtained before returning any goods. The customer pays for inbound freight, and OK International pays for return freight of the same category for replaced consumables.

If it is determined that the products have been misused, such as using the products for purposes they were not designed for, or if there are unauthorized modifications, then the guarantee is void.

Please note: Plastic consumables have a recommended “shelf life” or “use by” of two (2) years from the date of delivery. If the consumables are stored appropriately, they may be usable beyond that date. Techcon/OK International cannot guarantee their quality after the two-year period.

## GLOSSARY

**Blending Color:** Mixing colors together to produce a third color with slight visible differences

**Blush:** Discoloration or change in gloss. Generally occurs at gate locations or abrupt changes in wall thickness.

**Bubbles:** Void pockets, typically seen only in transparent parts. May appear as bulge or protrusion in an opaque part.

**Burns:** Brown marks or streaks.

**Cold Slug:** First material to enter the mold during injection. Solid or semi-solid, this material leaves a distinct border with adjacent melted material, similar in appearance to welding.

**Contamination:** Large areas of discoloration from foreign material, embedded in the part or on the surface of the part.

**Cracking:** Stress-induced splitting or fissures causing separation of material.

**Crazing:** Multiple tiny cracks due to stress exerted on the part

**Delamination:** Separation or peeling of layers of plastic

**Discoloration:** Any change from the original color standard. Unintended, inconsistent color.

**Drag Marks:** Clusters of scratches from plastic dragging against mold details when a part is ejected from a mold.

**Flash:** Excess plastic at the parting line or mating surface of the mold. Normally a very thin and flat protrusion of plastic along an edge of a part. Can also appear as a very thin string or thread of plastic away from the edge of a part (string flash). Often found at vents, knock outs, and other shut-off areas.

**Gas Marks:** Dark discolored streaks caused by incomplete venting of gases, generated during the molding cycle.

**Gouge:** Surface imperfection due to abrasion that removes small amounts of material. Depth is measurable.

## GLOSSARY

**Grease:** Any type of machine lubrication on the surface of a part

**Knit Lines:** Visible lines where two or more fronts of molten plastic converge. Also called "knit lines" or "flow lines."

**Marbling:** Colored streaks caused by incomplete mixing of two different-colored plastics. Also referred to as "streaking."

**Nicks:** Like gouge, but of short length. Caused by impact rather than abrasion.

**Orange Peel:** Rippled or mottled appearance, viewable as concentric lines, caused by under-pressurizing. Orange peel is often the first sign of possible sink or shorting.

**Pin Push:** Protrusion of distortion caused by an ejector pin pushing into the part more than normal. The protrusion is most evident on the surface opposite the ejector pin.

**Pitting:** Crater-like imperfections on the surface of the part.

**Pulling:** Part distortion caused from plastic catching in the mold when the part is ejected.

**Scratch:** Surface imperfection due to abrasion that removes small amounts of material. Depth is not measurable. Differs from scratch in mold which leaves a consistent mark.

**Shine/Bald:** Glossy area on local surface.

**Shorts:** Missing plastic due to incomplete filling of the mold cavity.

**Sink:** Surface depression caused by non-uniform material solidification and shrinkage. Most often noted at interface between differing wall thicknesses.

**Pecks:** Small discolored points of matter embedded in the surface. Typically, black, caused by material contamination or material degradation.

**Splay:** Off-colored streaking. Usually appears silver-like. Splay is caused by moisture in the material or thermal degradation of the resin during processing. A similar look can be caused by cold material skipping across the surface during a fast fill. This is commonly called "jetting" String Flash.

**Waviness:** Wavy surface

## Dispensing Tip Color Coding & Gauge

TE Series & TE Bent Series Tips

Color		Gauge	I.D. (inches)	I.D. (mm)
Olive		14	0.063	1.600
Amber		15	0.054	1.371
Green		18	0.033	0.838
Pink		20	0.024	0.610
Purple		21	0.020	0.508
Blue		22	0.016	0.406
Orange		23	0.013	0.330
Red		25	0.010	0.254
Clear		27	0.008	0.203
Lavender		30	0.006	0.152
Yellow		32	0.004	0.102
Lime Green		34	0.0037	0.095

## Abbreviations Commonly Used in this Catalog

Abbreviation	Name
CA	Cyanoacrylate Adhesive
EPDM	Ethylene propylene diene monomer rubber
EPR	Ethylene Propylene Rubber
FFKM	Perfluoroelastomer
PE	Polyethylene
PEEK	Polyether ether ketone
PFE	Perfluoroelastomer
PP	Polypropylene
PU	Polyurethane
UHMWPE	Ultra-High Molecular Weight Polyethylene

While both FFKM and PFE refer to the same type of material (perfluoroelastomer), "PFE" often specifically denotes the line of perfluoroelastomers manufactured by 3M Dyneon™.

## Cartridge Conversion: Imperial & Metric

Imperial	Metric	Metric Techkit Volume
2.5 oz	65 ml	50 ml
6 oz	165 ml	140 ml
8 oz	225 ml	210 ml
1/10 gal	310 ml	280 ml
12 oz	330 ml	
20 oz	600 ml	550 ml
